

Tommy Eastman

Employment

CleanCart Technologies Interim CTO

Remote
Jan. 2026 to Current

- Mobile app for ordering healthy groceries for real-time delivery (Instacart clone with unhealthy products filtered out, checkout via Instacart) plus marketplace of curated health products integrated across 20+ Shopify stores; built full ingredient/product catalog
- **Designed full tech stack from scratch:** database, frontend, backend, product analytics, error monitoring, feature flags, multi-environment infrastructure, and CI/CD pipeline
- Wrote all code for v1 and shipped to the App Store; hired and onboarded development team to scale from there

Fortegra Vice President of Data Science

Remote
Apr. 2023 to Jan. 2026

- Global specialty insurer providing credit protection, warranty and specialty insurance; \$3.3B in gross written premium
- **Built AI actuarial models to forecast risk across multiple insurance products;** saved the company \$25MM+ through improved pricing accuracy and loss forecasting
- Designed and shipped self-serve analytics web app used daily by underwriters, actuaries, and claims teams; replaced static reports with on-demand querying and interactive dashboards
- **Integrated LLM-powered assistants into ServiceNow** to drive claims operational efficiency and improve claims decisioning quality; reduced average handle time, enabled more consistent adjudication, and surfaced relevant policy context to adjusters in real time
- **Architected end-to-end Databricks data pipeline** pulling from multiple source systems; combined traditional Python ETL/wrangling with ML-based anomaly detection for automated data quality enforcement
- Established rigorous DevOps practices including automated regression testing and end to end testing of both the data pipeline and frontend web app on every commit
- Led cross-functional collaboration across data science, engineering, analytics, underwriting, and claims teams

Lokyata Product & Data Science Director (prev. Lead Data Scientist, Machine Learning Engineer)

Washington, DC / Remote
Aug. 2018 to Oct. 2022

- AI underwriting platform supporting global financial inclusion; serving \$40MM+ decisions/year
- **Led development of 3 products from scratch** (ML platform & 2 ML scoring products); owned product roadmaps and all product, data science, engineering, QA, devops, and infrastructure decisions
- Joined as first employee; **built out data science, engineering, and AWS teams;** created hiring/review process; mentored and led global teams
- **Led all data science and modeling;** built ML underwriting models for microloans, BNPL, personal and business loans. Reduced losses 50%+ and increased lender ROI 70%+
- **Led all analytics;** designed Python ETL pipeline and Snowflake/Tableau/QuickSight stack processing >100k loan applications/day
- Architected proprietary model dev pipeline (data prep, feature engineering, selection, testing); cut model development time 75%
- Invented proprietary TransparentAI tech for compliance and trust; explanations in <100ms, faster than leading explainable AI solutions
- Co-created AWS architecture (CI/CD, deployment, hosting, A/B testing) achieving 99.9% uptime

Dormie Chief Data Scientist, Software Developer

Washington, DC
Dec. 2017 to Aug. 2018

- Competitive golf matchmaking app; players meet through the app, play in person, climb the leaderboard
- **Owned all data science decisions.** Designed and implemented proprietary statistical algorithm to rank players, with logic for individual matches and group games
- Wrote 50% of codebase in production React Native (iOS & Android) app; reviewed all incoming code
- Co-architected GraphQL database; co-developed product roadmap, business model, growth strategy, UX, and design

Quantitative Advisory Services, Ernst & Young Senior Consultant

Tyson's Corner, VA
July 2015 to Feb. 2018

- **Built and validated statistical risk models for large financial institutions,** primarily using R
- Validated suite of 30+ CCAR credit risk models for large US bank; presented methodology and recommendations to client Model Risk Management committee, including the CRO
- Built NLP-based Random Forest model on customer complaint data to identify risks; led 5-person team and was point of contact for client
- Built automated framework for analysis of 100+ credit risk models; led CECL planning discussions with risk executives
- Delivered regular internal trainings to 30-person team on R, NLP, and neural networks

Self Employed Private Tutor (Data Science) & PhD Thesis Advisor

Washington, DC
Feb. 2017 to Current

- Tutor PhD/graduate statistics professor in Python, R, and statistical applications (preprocessing, clustering, dimension reduction, modeling, NLP, optimization); developed curricula for three graduate courses
- Performed all data analysis for PhD candidate's thesis on project management efficacy; built logistic and word2vec NLP models in Python to analyze interview data

Mortgage Modeling & Analytics, Wells Fargo Credit Risk Modeling Intern

Frederick, MD
June 2014 to Aug. 2014

- Built timing curves for Severity Model in SAS to improve loss realization forecasting; analyzed effects of home valuation metrics on logistic default model

Contact

- ✉ tommyeastman1@gmail.com
- 📍 Remote (Asheville, NC)
- 🌐 [linkedin.com/in/tommyeastman](https://www.linkedin.com/in/tommyeastman)

Education

James Madison University
B.S. Quantitative Finance 2015
Minors: Mathematics, Economics
Cum Laude

- Fiduciary for entirely student-run equity portfolio
- Developed code in C++ to price exotic options using Monte Carlo and Heston simulation
- Utilized SAS to develop and test a successful technical trading strategy that outperformed a buy and hold strategy over 30 years
- Private tutor for Economics, Statistics, and Calculus

Volunteering

Teamesteem · Aug. 2017 to Aug. 2018
Data Science Mentor

Teamesteem strives to cultivate conscious, aware, globally-minded leaders. Gave presentations on data science, artificial intelligence, and automation.

Skills

LANGUAGES/Frameworks

Python, R, Javascript, React/RN/Redux, SAS, C#, C++, Bash

ML

Python ML (Sklearn, Keras, PyTorch, Tensorflow)
Algorithms (LightGBM, RandomForest, XGBoost, Neural Networks)
Explainable AI (PDP, ICE, ALE, Permutation Shuffling, LIME, SHAP)
LLMs (OpenAI, Anthropic, prompt engineering, RAG)

AWS

EC2, S3, RDS, Lambda, API Gateway, ECS, Batch, IAM, CloudFormation
System Design & Security

Azure

VMs, Blob Storage, SQL Database, Functions, API Management, Container Apps, Entra ID, Azure ML

DATABASE

SQL, Snowflake, mongoDB, firebase, GraphQL, Supabase

OTHER

ETL Platforms (Dataiku, Databricks)
Data Visualization (Tableau, QuickSight, Streamlit)
Hosting (Fly.io)
Version Control (Git, Data Version Control)
CI/CD (GitHub Actions, CircleCI, Jenkins)

LEADERSHIP

Build cultures where it's safe to own mistakes and voice feedback, where people feel empowered, and where change, innovation, and evolution are constant
Agile Development
Demand, Portfolio, and Project Management
